

THE ANNALS
of
PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

VOLUME 9

1981

CONTENTS OF VOLUME 9
ARTICLES AND SHORT COMMUNICATIONS

Special Invited Papers

FREED, KARL F. Polymers as self-avoiding walks	537-556
GOODMAN, V., KUELBS, J. AND ZINN, J. Some results on the LIL in Banach space with applications to weighted empirical processes	713-752
KUELBS, J., ZINN, J. AND GOODMAN, V. Some results on the LIL in Banach space with applications to weighted empirical processes	713-752
PRUITT, WILLIAM E. General one-sided laws of the iterated logarithm	1-48
SPITZER, FRANK. Infinite systems with locally interacting components	349-364
ZINN, J., GOODMAN, V. AND KUELBS, J. Some results on the LIL in Banach space with applications to weighted empirical processes	713-752

Articles and Short Communications

ARAUJO, ALOISIO, GINÉ, EVARIST, MANDREKAR, V. AND ZINN, JOEL. On the accompanying laws theorem in Banach spaces	202-210
ARRATIA, RICHARD. Limiting point processes for rescaling of coalescing and annihilating random walks on \mathbb{Z}^d	909-936
ASTBURY, KENNETH. Order convergence of martingales in terms of countably additive and purely finitely additive martingales	266-275
BARLOW, M. T. Construction of a martingale with given absolute value	314-320
BECKER, M. E. Multiparameter groups of measure-preserving transfor- mations; a simple proof of Wiener's ergodic theorem	504-509
BERBEE, HENRY. On covering single points by randomly ordered intervals	520-528
BICHTELER, KLAUS. Stochastic integration and L^p -theory of semimartingales	48-49
BINGHAM, N. H. Tauberian theorems and the central limit theorem	221-231
BLACKWELL, D. Borel sets via games	321-322
BLOCK, HENRY W. AND SAVITS, THOMAS H. Multidimensional IFRA processes	162-166
BRAMSON, MAURY AND GRAY, LAWRENCE. A note on the survival of the long-range contact process	885-890
BRAMSON, MAURY AND GRIFFEATH, DAVID. On the Williams-Bjerknes tumour growth model I	173-185
BRAMSON, MAURY AND NEIDHARDT, ARNOLD. Thin but unavoidable sets	154-156
BROWN, MARK. Further monotonicity properties for specialized re- newal processes	891-895
BURGESS, JOHN P. AND MAULDIN, R. DANIEL. Conditional distributions and orthogonal measures	902-906
BURKHOLDER, D. L. A geometrical characterization of Banach spaces in which martingale difference sequences are unconditional	997-1011

BYCZKOWSKI, T. AND ZAK, T. Asymptotic properties of semigroups of measures on vector spaces	211-220
CHERNICK, MICHAEL R. A limit theorem for the maximum of autoregressive processes with uniform marginal distributions	145-149
CHERNOFF, HERMAN. A note on an inequality involving the normal distribution	533-535
COHEN, JOEL E. A geometrical representation of a stochastic matrix: theorem and conjecture	899-901
COX, J. THEODORE AND DURRETT, RICHARD. Some limit theorems for percolation processes with necessary and sufficient conditions ..	583-603
CsÖRGÖ, M. AND STEINEBACH, J. Improved Erdös-Rényi and strong approximation laws for increments of partial sums	988-996
CsÖRGÖ, SÁNDOR. Limit behavior of the empirical characteristic function	130-144
DE ACOSTA, ALEJANDRO. Inequalities for B -valued random vectors with applications to the strong law of large numbers	157-161
DEMKO, STEPHEN AND HILL, THEODORE P. Decision processes with total-cost criteria	293-301
DEVROYE, LUC. Laws of the iterated logarithm for order statistics of uniform spacings	860-867
DURRETT, RICHARD AND COX, J. THEODORE. Some limit theorems for percolation processes with necessary and sufficient conditions ..	583-603
DURRETT, RICHARD AND LIGGETT, THOMAS M. The shape of the limit set in Richardson's growth model	186-193
EAGLESON, G. K. An extended dichotomy theorem for sequences of pairs of Gaussian measures	453-459
ELTON, JOHN. A law of large numbers for identically distributed martingale differences	405-412
EMBRECHTS, PAUL AND GOLDIE, CHARLES M. Comparing the tail of an infinitely divisible distribution with integrals of its Lévy measure	468-481
ENGLUND, GUNNAR. A remainder term estimate for the normal approximation in classical occupancy	684-692
ERICKSON, ROY V. Lipschitz smoothness and convergence with applications to the central limit theorem for summation processes ..	831-851
FEIGIN, PAUL D. AND PASSY, URY. The geometric programming dual to the extinction probability problem in simple branching processes	498-503
GINÉ, EVARIST, MANDREKAR, V., ZINN, JOEL AND ARAUJO, ALOISIO. On the accompanying laws theorem in Banach spaces	202-210
GLOVER, JOSEPH. Raw time changes of Markov processes	90-102
GLOVER, JOSEPH. Applications of raw time-changes to Markov processes	1019-1029
GOLDIE, CHARLES M. AND EMBRECHTS, PAUL. Comparing the tail of an infinitely divisible distribution with integrals of its Lévy measure	468-481

CONTENTS OF VOLUME 9

v

GOLDSTEIN, MARTIN I. AND HOPPE, FRED M. Necessary and sufficient lifetime conditions for normed convergence of critical age-dependent processes with infinite variance	490-497
GÖTZE, F. On Edgeworth expansions in Banach spaces	852-859
GRAY, LAWRENCE AND BRAMSON, MAURY. A note on the survival of the long-range contact process	885-890
GRIFFEATH, DAVID AND BRAMSON, MAURY. On the Williams-Bjerknes tumour growth model I	173-185
GROENEBOOM, PIET AND SHORACK, GALEN R. Large deviations of goodness of fit statistics and linear combinations of order statistics	971-987
HAHN, MAJORIE G. AND KLASS, MICHAEL J. The multidimensional central limit theorem for arrays normed by affine transformations	611-623
HALL, PETER AND HEYDE, C. C. Rates of convergence in the martingale central limit theorem	395-404
HANSON, D. L. AND RUSSO, RALPH P. On the law of large numbers	513-519
HARRIS, THEODORE E. Brownian motions on the homeomorphisms of the plane	232-254
HARRISON, J. MICHAEL AND REIMAN, MARTIN I. Reflected Brownian motion on an orthant	302-308
HARRISON, J. M. AND SHEPP, L. A. On skew Brownian motion	309-313
HALL, PETER. A converse to the Spitzer-Rosén theorem	633-641
HANNUM, ROBERT C., HOLLANDER, MYLES AND LANGBERG, NAFTALI. Distributional results for random functionals of a Dirichlet process	665-670
HELLAND, INGE S. Minimal conditions for weak convergence to a diffusion process on the line	429-452
HELMERS, R. A Berry-Esseen theorem for linear combinations of order statistics	342-347
HEYDE, C. C. AND HALL, PETER. Rates of convergence in the martingale central limit theorem	395-404
HILL, THEODORE P. AND DEMKO, STEPHEN. Decision processes with total-cost criteria	293-301
HOLLANDER, MYLES, LANGBERG, NAFTALI A. AND HANNUM, ROBERT C. Distributional results for random functionals of a Dirichlet process	665-670
HOLST, LARS. On convergence of the coverage by random arcs on a circle and the largest spacing	648-655
HOLST, LARS. Some conditional limit theorems in exponential families	818-830
HOPPE, FRED M. AND GOLDSTEIN, MARTIN I. Necessary and sufficient lifetime conditions for normed convergence of critical age-dependent processes with infinite variance	490-497
HUDSON, WILLIAM N. AND MASON, J. DAVID. Operator-stable distri-	

butions on R^2 with multiple exponents	482-489
IRLE, ALBRECHT. Transitivity in problems of optimal stopping	642-647
KALIKOW, STEVEN A. Generalized random walk in a random environment	753-768
KALLENBERG, OLAV. Splitting at backward times in regenerative sets	781-799
KIEFFER, JOHN AND RAHE, MAURICE. Selecting universal partitions in ergodic theory	705-709
KLASS, MICHAEL J. A method of approximating expectations of functions of sums of independent random variables	413-428
KLASS, MICHAEL J. AND HAHN, MARJORIE G. The multidimensional central limit theorem for arrays normed by affine transformations	611-623
KUELBS, J. When is the cluster set of S_n/a_n empty?	377-394
KURTZ, THOMAS G. The central limit theorem for Markov chains	557-560
LANDERS, DIETER AND ROGGE, LOTHAR. The natural median	1041-1042
LANGBERG, NAFTALI A., HANNUM, ROBERT C. AND HOLLANDER, MYLES. Distributional results for random functionals of a Dirichlet process	665-670
LE JAN, YVES. On the jumps of time changed diffusions	1043-1044
LEPAGE, RAOUL, WOODROOFE, MICHAEL AND ZINN, JOEL. Convergence to a stable distribution via order statistics	624-632
LIGGETT, THOMAS M. AND DURRETT, RICHARD. The shape of the limit set in Richardson's growth model	186-193
LIN, T. F. Multiple integrals of a homogeneous process with independent increments	529-532
LORENZEN, THOMAS J. Optimal stopping with sampling cost: the secretary problem	167-172
MACQUEEN, J. Circuit processes	604-610
MANDREKAR, V., ZINN, JOEL, ARAUJO, ALOISIO, AND GINÉ, EVARIST. On the accompanying laws theorem in Banach spaces	202-210
MARCUS, MICHAEL B. Weak convergence of the empirical characteristic function	194-201
MASON, DAVID M. Bounds for weighted empirical distribution functions	881-884
MASON, J. DAVID AND HUDSON, WILLIAM N. Operator-stable distributions on R^2 with multiple exponents	482-489
MAULDIN, R. DANIEL AND BURGESS, JOHN P. Conditional distributions and orthogonal measures	902-906
MILLAR, P. W. Comparison theorems for sample function growth	330-334
MITRA, SHASHANKA S. Distribution of symmetric stable laws of index 2^{-n}	710-711
NAIR, K. AIYAPPAN. Asymptotic distribution and moments of normal extremes	150-153
NEIDHARDT, ARNOLD AND BRAMSON, MAURY. Thin but unavoidable sets	154-156
NEWMAN, C. M. AND WRIGHT, A. L. An invariance principle for	

CONTENTS OF VOLUME 9

vii

certain dependent sequences	671-675
NISHIOKA, KUNIO. The degenerate Neumann problem and degenerate diffusions with Venttsel's boundary conditions	103-118
OKAZAKI, YOSHIKI. Bochner's theorem on measurable linear functionals of a Gaussian measure	663-664
PAKSHIRAJAN, R. P. AND VASUDEVA, R. A functional law of the iterated logarithm for a class of subordinators	1012-1018
PASSY, URY AND FEIGIN, PAUL D. The geometric programming dual to the extinction probability problem in simple branching processes	498-503
PERKINS, EDWIN. A global intrinsic characterization of Brownian local time	800-817
PITMAN, J. W. AND ROGERS, L. C. G. Markov functions	573-582
PITTEL, B. G. Limiting behavior of a process of runs	119-129
PITTENGER, A. O. Regular birth times for Markov processes	769-780
PRUITT, WILLIAM E. The growth of random walks and Lévy processes	948-956
RAHE, MAURICE AND KIEFFER, JOHN C. Selecting universal partitions in ergodic theory	705-709
RAMACHANDRAN, D. A note on regular conditional probabilities in Doob's sense	907-908
REIMAN, MARTIN I. AND HARRISON, J. MICHAEL. Reflected Brownian motion on an orthant	302-308
REISS, R.-D. Approximation of product measures with an application to order statistics	335-341
RITTER, GRANT A. Growth of random walks conditioned to stay positive	699-704
ROGGE, LOTHAR AND LANDERS, DIETER. The natural median	1041-1042
ROGERS, L. C. G. Characterizing all diffusions with the $2M-X$ property	561-572
ROGERS, L. C. G. AND PITMAN, J. W. Markov functions	573-582
ROSALSKY, ANDREW AND TEICHER, HENRY. A limit theorem for double arrays	460-467
ROSS, SHELDON M. Generalized Poisson shock models	896-898
RÜSCHENDORF, LUDGER. Ordering of distributions and rearrangement of functions	276-283
RUSSO, RALPH P. AND HANSON, D. L. On the law of large numbers	513-519
SAMUELS, STEPHEN M. AND STEELE, J. MICHAEL. Optimal sequential selection of a monotone sequence from a random sample	937-947
SATO, HIROSHI. Gaussian measurable dual and Bochner's theorem	656-662
SAVITS, THOMAS H. AND BLOCK, HENRY W. Multidimensional IFRA processes	162-166
SHENKER, M. The mean number of real roots for one class of random polynomials	510-512
SHEPP, L. A. AND HARRISON, J. M. On skew Brownian motion	309-313
SHORACK, GALEN R. AND GROENEBOOM, PIET. Large deviations of	

goodness of fit statistics and linear combinations of order statistics	971-987
STEELE, J. MICHAEL. Subadditive Euclidean functionals and nonlinear growth in geometric probability	365-376
STEELE, J. MICHAEL AND SAMUELS, STEPHEN M. Optimal sequential selection of a monotone sequence from a random sample	937-947
STEINEBACH, J. AND CSÖRGÖ, M. Improved Erdös-Rényi and strong approximation laws for increments of partial sums	988-996
TAKAHATA, HIROSHI. L_∞ -bound for asymptotic normality of weakly dependent summands using Stein's result	676-683
TEICHER, HENRY AND ROSALSKY, ANDREW. A limit theorem for double arrays	460-467
TEUGELS, JOZEF L. Limit theorems on order statistics	868-880
ULBRICHT, RALF. Weighted sums of independent identically distributed random variables	693-698
VASUDEVA, R. AND PAKSHIRAJAN, R. P. A functional law of the iterated logarithm for a class of subordinators	1012-1018
WASHBURN, ROBERT B. JR., AND WILLSKY, ALAN S. Optimal sampling of submartingales indexed by partially ordered sets	957-970
WILLSKY, ALAN S. AND WASHBURN, JR., ROBERT B. Optional sampling of submartingales indexed by partially ordered sets	957-970
WHITTLE, P. Arm-acquiring bandits	284-292
WOODROOFE, MICHAEL, ZINN, JOEL AND LEPAGE, RAOUL. Convergence to a stable distribution via order statistics	624-632
WRIGHT, A. L. AND NEWMAN, C. M. An invariance principle for certain dependent sequences	671-675
WRIGHT, F. T. The empirical discrepancy over lower layers and a related law of large numbers	323-329
YU, KAI FUN. Note on a theorem of Woodroffe's	1030-1033
ŽAK, T. AND BYCZKOWSKI, T. Asymptotic properties of semigroups of measures on vector spaces	211-220
ZAKAI, MOSHE. Some classes of two parameter martingales	255-265
ZEEPHONGSEKUL, P. Laplace functional approach to point processes occurring in a traffic model	1034-1040
ZINN, JOEL, ARAUJO, ALOISIO, GINÉ, EVARIST AND MANDREKAR, V. On the accompanying laws theorem in Banach spaces	202-210
ZINN, JOEL, LEPAGE, RAOUL AND WOODROOFE, MICHAEL. Convergence to a stable distribution via order statistics	624-632
